

COL. HENRY W. ANDERSON

Col. Henry W. Anderson of Richmond, Va., who has just been elected by King Ferdinand with the Grand Council of the Star of Romania, is the son of the late Gen. Henry W. Anderson, who was the "father of New Mexico." Col. Anderson has been informed by the Virginia Republican state convention as its candidate for vice president of the United States.

Telegraph Operator, Famous Cook, Pinched

CARRISBON, N. M., Sept. 16.—(Associated Press) The West of the U. S. & C. W. has made one of the most remarkable criminal roundups that has taken place in this part of the country. The prisoner, Ben Howell Reynolds, has served in the White House penitentiary under the alias of Timothy Patrick Kennedy with Hamilton No. 7224, being convicted of the theft of money while in the employ of the U. S. & C. W. at City, Washington. He has served time in California, Montana, Washington, and other states under the alias of John Cartwright Foster, George Harry Dunn, Harold Chase Butler, J. D. Archibald, Harry Henderson, Wall, Don Carson, Don Corrigan, George Brockman, and a dozen other names. He is a railroad telegraph operator, in which position he has absconded with money from various roads and express companies while acting as their agent.

He has served out, fled out, and dug out of many prisons, the last one being at Hutchinson, Kansas, where he escaped from jail on July 26, 1933. His liberty was short, however, for on the night of August 15, Mr. West received a "tip" that the man the police had been hunting was in this neighborhood, and on hearing that a new operator had been put in at Duran, he made haste to that place to take a "stake" at him. Armed with the standard of identification containing the man's photograph which is closely descriptive, West soon located him and had as he was in the act of returning his pass for the night, he was arrested.

Reynolds did not resist arrest, according to the account given by the Carrisbon Outlook. He hadn't the time, for the detective knowing with whom he had to contend, crept quietly into the office and unfurled Reynolds, who had secured the position under the name of Johnson, covering him before he had time to draw the revolver, which West afterwards found in the inside pocket of his jumper in a position for instant use. The prisoner was brought to Carrisbon where after being safely lodged in the county jail, the authorities at Hutchinson were informed of the capture. Congratulating Mr. West on the importance of the arrest, they asked if he would come without requisition papers. He refused to be taken without them.

Sheriff Brown arrived Thursday with requisition papers and left on No. 4 with the prisoner for Hutchinson, where else watch will be kept to prevent him from again seeing his way to liberty.

GLYCERINE MIXTURE FOR GAS IN STOMACH

Simple glycerine, kumkum bark, etc., as mixed in Adler's-ka relieves ANY CASE gas on stomach or over stomach. It acts on both upper and lower bowel and removes all food matter which poisons stomach. Offers CURE constipation. Prevents appendicitis. The INSTANT pleasant action of Adler's-ka surprises both doctors and patients. One man who suffered five years from indigestion and constipation was helped by ONE dose. Columbus Drug Company.

The Columbus Courier is the official paper of Luna County. If you want to read of the official doings of the County Commissioners read the Courier.

A defective link in the anchor chain gives way as the ship is getting under way, and the anchor sinks to the bottom of the sea. A buoy is immediately dropped over the side of the ship as a mark for the diver who will shortly dive in an effort to salvage the anchor. Air pumps are brought to the surface, the diving dress is put on the diver while waiting shipmates put his heavily weighted shoes on his feet. His back and chest-plates are now put on. Lastly his helmet with brass plate is slipped over his head, the flexible, non-collapsible air hose is connected with air pumps and the diver is ready.

Over the side of the ship's small

boat he is lowered and as the little bubbles of air come to the surface marking the direction of the anchor, the pumps are set in motion. Finally after feeling his way along the muddy bottom, the diver locates the anchor, secures a heavy line around it, gives two sharp pulls on the cord, signifying to the men above that he is ready to come to the surface, and his job is finished.

The above episode, a Navy diver recovering his final instructions just before descending into the deep, could hardly be described as a part of his work—the floor of the ocean with its many strange objects is no mystery to him.

Prisoner Held Beyond Term; Ordered Released

The supreme court yesterday afternoon ordered the release of Francisco Vago, a convict who had completed his sentence, from the state penitentiary. The prisoner was held beyond his term at the request of Colorado authorities, who said that he was wanted on several charges. The nature of the charges was not made known. The prisoner was brought before the supreme court following the beginning of habeas corpus proceedings and the court finding that the prison officials had no warrant for holding the man other than the simple request, granted him his release. Vago was taken back to prison, given a discharge and started on his way home.

S.W. Tularosa Preparing To Bring in Their Well

CARRISBON, N. M., Sept. 8.—Reports from Omeira and Tularosa say the Southwestern Tularosa Oil & Refining company is preparing to bring in its well. Interested oil men are crowding the hotels in Tularosa. Representatives of the Standard, Union Pacific, and many other oil companies have been there for the past week waiting to see what the letters will be a gasifier when brought in. The drill entered the oil sand last week. The drill was withdrawn and the crew has been busy since lowering the casing to cut off the water. This work, it is said, will be completed in less than a week, when drilling into the oil sand will be resumed, and, according to expert opinion oil of commercial quantity should be tapped at from ten to twenty feet. The company in the meantime is building a large reservoir close to the well site to hold the oil.

"Cox and Civilization," "Harding and Hell"

New York, Sept. 8.—The Rev. W. F. Sheehan of this city, an independent, non-partisan minister of the Gospel, is living up to the fundamental principles of Christianity—peace—by supporting the League of Nations, has supplied one of the best campaign slogans on this issue. It is "Cox and Civilization vs. Harding and Hell!"

Founding press of the Courier of Dec. 11, 1910 to 1911. Daily press also.

If Not a Myth, No Use For Gasoline

Buffalo, Sept. 16.—(Associated Press) Albert M. Hubbard, 12, boy inventor of the "wonderful power generator," solved the power problem of the west.

Wherever I have traveled in the northwest I heard the same question by farmers and business men and themselves—'Has this boy Hubbard what he says he has?' Faith in him.

They have faith in him not only the Pacific coast where, after engineers and scientists, all eyes are turned to him, but he has called him a laborer, he put his machine through the tests they said it could not meet and confounded them all.

Hubbard's invention consists of a series of eight small coils of wire wound on insulated steel bars and arranged in a certain manner around a large central bar of steel. The whole device is surrounded by still another coil of wire, with winding several miles of fine, silk wound wire and a few pounds of brass and steel.

Deliver Launch. That's all, he says, and yet a coil 11 inches by 10 inches produced 15 horse-power, spinning a motor at 2000 revolutions a minute and driving an 18-horse launch at 11½ miles an hour through the water!

The launch test was in the presence of witnesses who watched carefully for any sign of trickery and found none.

Attempted 'perpetual motion' scoffed the engineers. 'All best' Another K-ley under. He's a laborer.

'Not so fast,' replied the Rev. Father William Smith, professor of physics at a Jesuit college here. 'I have been the inside of his machine. It doesn't take power from the air, as he thinks, and it isn't perpetual motion. It will supply power for a long time and I think that a coil 18 feet long and properly built would furnish 15000 horse-power—enough to drive the battleship New Mexico.'

Then Hubbard's rise to fame began.

Weeks Patent. That was fast November. He applied for a patent three months ago and expects to receive protection of his invention in another two months. In the meantime, in a laboratory at Everett, 30 miles from Seattle, he experiments and tinkers with his apparatus.

Mindful of the recent trouble that inventors have perpetrated with similar claims, people 'go slow' on the invention of this boy.

As for Hubbard, he delights in facing the 'wise boys.' With the exception of Father Smith, no one around Everett has ever doubted a Hubbard coil. Hubbard says.

Amused by the charges of fraud made after one test, Hubbard commented to let me 'see the works.' He trusted my ignorance of all except the fundamentals of electricity.

Taken A Part. In a room several miles from Hubbard's workshop, I took the crude little black-tape-and-sheet-iron contrivance in my hands. Two bits of wire protruded from it and an ordinary 110-volt electric lamp glowed at the end of these. Hubbard sat across the room. A quill of the brass end from the coil. The connection was broken, the lamp went out. I saw a row of little coils, like sewing machine bobbins—eight of them.

I took one of the coils—they were all alike—between the jaws of my pliers and pulled it out, unraveling the wire and laughing it. It was solid—just a coil of wire. There was not a whiff of a drop of acid that I could find.

And that's the mystery—without chemicals or acids 'it can't run,' said the experts.

'It does run and there are no wheels and no fluids,' says Hubbard.

DR. ALBERT EINSTEIN

A recent photo of Dr. Albert Einstein, the greatest scientist whose theory of relativity has been discussed the world over, who, it is reported, will accept a place on the faculty of the new University of Jerusalem, being built as part of the "Back to Palestine" movement now being fostered by the Zionists the world over.

Medicine Peddler Fined; Does It Again, Alleged

San Jose, N. M., Sept. 16.—Juan Gansara, who is said to have studied the art of tinkering on machines in Guadalupe, was before the federal court here on July 29, of this year, and pleaded guilty to the information charging him with shipping bottles containing alleged medicines accompanied by fraudulent statements about their so-called curative value. Gansara was fined \$250 and costs. He paid the fine and returned to Albuquerque.

Today U. S. District Attorney Summers Burkhardt filed another information against Mr. Gansara charging him with the same offense. Or to be more specific, with violation of the Food and Drug Act, on July 26, one day after he appeared in the federal court here by shipping in Imperial, California, a box containing two bottles, one containing a so-called medicine labeled 'La Nobilissima' and another 'Sin Final,' one to make more blood and the other for curing kidney troubles.

It is charged that the so-called medicines were mislabeled within the meaning of the Act of Congress and that the statements on the labels and circulars were false and fraudulent.

Silver City Planning Tourist Camp Grounds

Silver City, Sept. 9.—At a recent meeting of the tourist committee of the Grant County Chamber of Commerce plans were made for the leveling of the tract of land east of the Broadway bridge and making the place an up-to-date tourist camp ground. The grounds will be equipped with free water and lights and a small pavilion will be erected in the center for a reading and rest room, where all kinds of literature regarding the surrounding country will be obtainable. The tourist committee is also making maps of side trips which may be taken and plan to make this one of the most popular tourist headquarters in the southwestern part of the state.

The Bazaar

We Prefer Competition

Because we invariably increase our sales where a comparison of the quality of the goods is made, and our enterprise system for all is realized by the customers.

Don't Have To Make Reputation

Because the Klein chain of stores are established in Columbus, Douglas, Las Cruces and El Paso.

Dry Goods and Notions

The Bazaar carries the best selected and largest stock of Dry Goods and Notions in the city, and courtesy, service and treatment is the invariable rule.

Gent's Furnishings

Everything for Men is to be found in the Gentle Department in this store. Nifty shirts, neckties, dressy neckwear and the latest in hats.

Shoes! Shoes! Shoes!

The Bazaar is the exclusive agency in Columbus for the famous Walk-Over line of shoes. All sizes, and one price to all.

THE BAZAAR

Made-in-Deming Display At the Luna County Fair

Deming, Sept. 16.—Plans are now being completed for the staging of the largest fair ever held in Luna county and an enthusiastic meeting was held here this week for the purpose of appointing committees and completing the program. Citizens and business men of Columbus will hold a meeting the first of the week to map out their share in the work and to determine what extent they will participate in the program. The following have been chosen as members of the executive committee:

- F. L. Nordhaus, chairman.
- Charles Higgins, secretary-treasurer.
- A. C. Hoyman, general superintendent.
- J. T. Dunne, assistant superintendent.

A feature of the fair this year will be the Made-in-Deming display which will be in charge of Dr. R. D. Dunne, who last year had charge of the display of war prizes. All the automobiles donated to this city will also be given a prominent place in the exhibit.

Mr. Homeowner

THE long winter evenings will soon be with us and the children will have to study and you will want to read. Why not have your home wired for light and the convenience of electric lights in your home. First, think of you not being on the telephone circuit. If you will call on us we will have a man come and figure with you on the best, or better still, we will come prepared to install them.

The Columbus Ice & Electric Co.
